

Academic Intervention Group - Mission Statement

The Academic Intervention Group (AIG) is a program committed to the retention of students. It is designed for the student who is dedicated to making a change in his/her approach to academic and personal development. In partnership with teachers, students, and parents, the AIG provides a comprehensive learning community experience that includes personal coaching, study groups, clinics, and tutorials that fully support the development and utilization of success-oriented skills and strategies.

The AIG is a school-wide support program for students in grades 5 through 12 who are not meeting academic expectations--either their own or those of the School. AIG is not a remedial program or a program that offers non-credit courses. Rather, we offer students with different educational goals an opportunity to participate in enrichment activities that enhance their academic experience.
