

**Rising 6th Grade -- Summer Math Practice  
(For students entering Math 6 or Pre-Algebra)**

I am looking forward to teaching you this upcoming school year! Together we will explore many mathematical topics. This will be a challenging journey, but one in which you will learn a lot. So you are prepared for our math adventure, I encourage you to keep your skills sharp this summer by completing this packet.

If you get to a problem that you are unfamiliar with or have forgotten how to work, ask a friend, neighbor or parent, or look it up online. Please don't skip it! Once you have solved the problem, ask yourself..."Does my answer make sense?"

It is not recommended that you complete this packet immediately following school dismissal in May, nor the night before the packet is due. Student learning is most effective if the packet is completed week by week during the months of June through August. Please bring the completed packet on the first full day of school. This will be your first grade in 6<sup>th</sup> grade math, so PLEASE follow directions.

How your packet of work should look:

- Please show all work for your problems. You may do your work next to the problem or on another sheet of paper.
- All work is to be neat.
- All work is to be completed in pencil without the use of a calculator.
- Keep the work together in a folder with your name on it.

I hope you have a terrific summer and I look forward to seeing you on the first day of school. Please email me if you have any questions: [rbauer@heathwood.org](mailto:rbauer@heathwood.org)

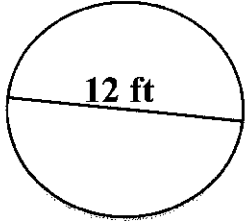

Sincerely,  
Mr. Bauer
